

Mr. Gregory Weiss
Weiss Prestaining, Inc.
P.O. Box 650
North Liberty, IN 46554

Re: **091-11522**
First Significant Permit Modification to
Part 70 No.: T 091-7626-00069

Dear Mr. Weiss:

Weiss Prestaining, Inc. was issued a permit on September 28, 1998 for an exterior wood siding painting and staining source. A letter requesting changes to this permit was received on November 3, 1999. Pursuant to the provisions of 326 IAC 2-7-12 a significant permit modification to this permit is hereby approved as described in the attached Technical Support Document.

The modification incorporates the equipment and conditions from CP 091-9572-00069, issued on December 1, 1998, into the Part 70 Operating Permit. The changes are as follows with deletions appearing as ~~strikeouts~~ and new language in **bold**:

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)]
[326 IAC 2-7-5(15)]

This stationary source consists of the following emission units and pollution control devices:

- (a) Four (4) flowcoating machines, identified as Units 1, 2, 3, and 4A, coating wood boards and panels with a combined capacity of 5,833.34 square feet per hour, with Unit 2 exhausting through Stack ID# V-1. One (1) dry room and one (1) dry area with four (4) general ventilation fans, identified as GV-1, GV-2, GV-3, and GV-4, are used to dry the boards. One (1) dip coat bucket, used to coat nails with a capacity of 3.88 pounds per hour, is exhausted to general ventilation.
- (b) **One (1) latex/oil based flow coater, known as Machine #5, exhausted to general ventilation fans 1, 2, 3 and 4, capacity: 7,500 square feet of wood siding panels or boards per hour on latex or 7,000 square feet of wood siding panels or boards per hour on oil.**
- (c) **One (1) oil based/latex flow coater, known as Machine #6, exhausted to Stack V-1 and to general ventilation fans 1, 2, 3 and 4, capacity: 7,000 square feet of wood siding panels or boards per hour on oil or 7,500 square feet of wood siding panels or boards per hour on latex.**

SECTION D.3 FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]

- (b) One (1) latex/oil based flow coater, known as Machine #5, exhausted to general ventilation fans 1, 2, 3 and 4, capacity: 7,500 square feet of wood siding panels or boards per hour on latex or 7,000 square feet of wood siding panels or boards per hour on oil.
- (c) One (1) oil based/latex flow coater, known as Machine #6, exhausted to Stack V-1 and to general ventilation fans 1, 2, 3 and 4, capacity: 7,000 square feet of wood siding panels or boards per hour on oil or 7,500 square feet of wood siding panels or boards per hour on latex.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.3.1 PSD Minor Limit [326 IAC 2-2] [40 CFR 52.21]

- (a) Pursuant to CP 091-9572-00069, issued on December 1, 1998, the input of volatile organic compounds to Machines 5 and 6 shall be limited to less than 250 tons, including coatings, dilution solvents, and cleaning solvents, per twelve (12) consecutive month period. This usage limit is required to limit the potential to emit of VOC to less than 250 per twelve (12) consecutive month period. Compliance with this limit makes 326 IAC 2-2 (Prevention of Significant Deterioration) and 40 CFR 52.21 not applicable. During the first 12 months of operation, VOC usage shall be limited such that the total VOC used divided by the accumulated months of operation shall not exceed the limit specified.
- (b) Any change or modification which may increase potential emissions to 250 tons per year from Machines 5 and 6 shall require approval from IDEM, OAM prior to making the change.

D.3.2 Volatile Organic Compounds and VHAPs [326 IAC 8-1-6] [326 IAC 2-1-3.4]

Pursuant to CP 091-9572-00069, issued on December 1, 1998, BACT was determined to be:

- (a) The as-installed flow coating machines with a high transfer efficiency.
- (b) A VOC emission limit of 249 tons per twelve (12) consecutive month period.
- (c) A maximum VOC coating content not to exceed 5.98 pounds per gallon less water on a weekly volume weighted average basis.
- (d) All stains and latex coatings shall not exceed a maximum VHAP content of (1.0) pound VHAP per pound solid, as applied.
- (e) The preparation and maintenance of a written work practice implementation plan within sixty (60) calendar days after permit issuance. The work practice implementation plan must define environmentally desirable work practices for each

wood coating manufacturing operation and at a minimum address each of the following work practice standards:

- (1) Operator training course.
- (2) Leak inspection and maintenance plan.
- (3) Flow coating machine cleaning.
- (4) The cleanup solvent containers used to transport solvent from drums to work stations be closed containers having soft gasketed closures.
- (5) The application equipment operators shall be instructed and trained on the methods and practices utilized to minimize spillage on the floor and over application.
- (6) Storage containers used to store VOC and/or HAPs containing materials shall be kept covered when not in use.
- (7) Cleanup solvents will be reused in the process as much as possible to reduce hazardous waste and the related impact on the environment.
- (8) Odd lot/batch overrun coatings will be reused as much as possible to reduce hazardous waste and the related impact on the environment.

Compliance Determination Requirements [326 IAC 2-1.1-11] [326 IAC 2-7-6(1)]

D.3.3 Testing Requirements [326 IAC 2-7-6(1)] [326 IAC 2-1.1-11]

The Permittee is not required to test these facilities by this permit. However, IDEM may require compliance testing when necessary to determine if these facilities are in compliance. If testing is required by IDEM, compliance with the VOC and VHAPs content limits specified in Condition D.3.2 shall be determined by a performance test conducted in accordance with Section C - Performance Testing.

D.3.4 Volatile Organic Compounds (VOC) and VHAPs

Compliance with the VOC content and usage limitations contained in Conditions D.3.1 and D.3.2 and VHAP content limitation contained in Condition D.3.2 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) using formulation data supplied by the coating manufacturer. IDEM, OAM, reserves the authority to determine compliance using Method 24 in conjunction with the analytical procedures specified in 326 IAC 8-1-4.

D.3.5 VOC Emissions

Compliance with Conditions D.3.1 and 3.2 shall be demonstrated within 30 days of the end of each month based on the total volatile organic compound usage for the most recent twelve (12) month period.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.3.6 Record Keeping Requirements

- (a) To document compliance with Conditions D.3.1 and D.3.2, the Permittee shall maintain records in accordance with (1) through (7) below. Records maintained for (1) through (7) shall be taken weekly and shall be complete and sufficient to establish compliance with the VOC emission limits established in Conditions D.3.1 and 3.2 as well as the VHAP content limit established in Condition D.3.2.
- (1) The amount and VOC content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
 - (2) A log of the dates of use;
 - (3) The volume weighted VOC content of the coatings used for each week;
 - (4) The cleanup solvent usage for each month;
 - (5) The total VOC usage for each week;
 - (6) The weight of VOCs emitted for each compliance period, and
 - (7) The maximum VHAP content in pounds of VHAP per pound solid, as applied, each day.
- (b) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.3.7 Reporting Requirements

A quarterly summary of the information to document compliance with Conditions D.3.1 and D.3.2 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported.

SECTION A

SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Management (OAM). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)]

The Permittee owns and operates a stationary exterior wood siding surface coating operation.

Responsible Official: Greg Weiss
Source Address: 3522 South SR 104, LaPorte, IN 46350
Mailing Address: P.O. Box 650, North Liberty, IN 46554
SIC Code: 2499
County Location: LaPorte
County Status: Attainment for all criteria pollutants
Source Status: Minor Source, under PSD Rules
Part 70 Permit Program

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)] [326 IAC 2-7-5(15)]

This stationary source consists of the following emission units and pollution control devices:

- (a) Four (4) flowcoating machines, identified as Units 1, 2, 3, and 4A, coating wood boards and panels with a combined capacity of 5,833.34 square feet per hour, with Unit 2 exhausting through Stack ID# V-1. One (1) dry room and one (1) dry area with four (4) general ventilation fans, identified as GV-1, GV-2, GV-3, and GV-4, are used to dry the boards. One (1) dip coat bucket, used to coat nails with a capacity of 3.88 pounds per hour, is exhausted to general ventilation.
- (b) One (1) latex/oil based flow coater, known as Machine #5, exhausted to general ventilation fans 1, 2, 3 and 4, capacity: 7,500 square feet of wood siding panels or boards per hour on latex or 7,000 square feet of wood siding panels or boards per hour on oil.
- (c) One (1) oil based/latex flow coater, known as Machine #6, exhausted to Stack V-1 and to general ventilation fans 1, 2, 3 and 4, capacity: 7,000 square feet of wood siding panels or boards per hour on oil or 7,500 square feet of wood siding panels or boards per hour on latex.

A.3 Specifically Regulated Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities, which are specifically regulated, as defined in 326 IAC 2-7-1(21).

- (a) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment.

A.4 Part 70 Permit Applicability [326 IAC 2-7-2]

This stationary source is required to have a Part 70 permit by 326 IAC 2-7-2 (Applicability) because:

- (a) It is a major source, as defined in 326 IAC 2-7-1(22).
- (b) It is a source in a source category designated by the United States Environmental Protection Agency (U.S. EPA) under 40 CFR 70.3 (Part 70 - Applicability).

SECTION D.3

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]

- (b) One (1) latex/oil based flow coater, known as Machine #5, exhausted to general ventilation fans 1, 2, 3 and 4, capacity: 7,500 square feet of wood siding panels or boards per hour on latex or 7,000 square feet of wood siding panels or boards per hour on oil.
- (c) One (1) oil based/latex flow coater, known as Machine #6, exhausted to Stack V-1 and to general ventilation fans 1, 2, 3 and 4, capacity: 7,000 square feet of wood siding panels or boards per hour on oil or 7,500 square feet of wood siding panels or boards per hour on latex.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.3.1 PSD Minor Limit [326 IAC 2-2] [40 CFR 52.21]

- (a) Pursuant to CP 091-9572-00069, issued on December 1, 1998, the input of volatile organic compounds to Machines 5 and 6 shall be limited to less than 250 tons, including coatings, dilution solvents, and cleaning solvents, per twelve (12) consecutive month period. This usage limit is required to limit the potential to emit of VOC to less than 250 per twelve (12) consecutive month period. Compliance with this limit makes 326 IAC 2-2 (Prevention of Significant Deterioration) and 40 CFR 52.21 not applicable. During the first 12 months of operation, VOC usage shall be limited such that the total VOC used divided by the accumulated months of operation shall not exceed the limit specified.
- (b) Any change or modification which may increase potential emissions to 250 tons per year from Machines 5 and 6 shall require approval from IDEM, OAM prior to making the change.

D.3.2 Volatile Organic Compounds and VHAPs [326 IAC 8-1-6] [326 IAC 2-1-3.4]

Pursuant to CP 091-9572-00069, issued on December 1, 1998, BACT was determined to be:

- (a) The as-installed flow coating machines with a high transfer efficiency.
- (b) A VOC emission limit of 249 tons per twelve (12) consecutive month period.
- (c) A maximum VOC coating content not to exceed 5.98 pounds per gallon less water on a weekly volume weighted average basis.
- (d) All stains and latex coatings shall not exceed a maximum VHAP content of (1.0) pound VHAP per pound solid, as applied.
- (e) The preparation and maintenance of a written work practice implementation plan within sixty (60) calendar days after permit issuance. The work practice implementation plan must define environmentally desirable work practices for each wood coating manufacturing operation and at a minimum address each of the following work practice standards:

- (1) Operator training course.
- (2) Leak inspection and maintenance plan.
- (3) Flow coating machine cleaning.
- (4) The cleanup solvent containers used to transport solvent from drums to work stations be closed containers having soft gasketed closures.
- (5) The application equipment operators shall be instructed and trained on the methods and practices utilized to minimize spillage on the floor and over application.
- (6) Storage containers used to store VOC and/or HAPs containing materials shall be kept covered when not in use.
- (7) Cleanup solvents will be reused in the process as much as possible to reduce hazardous waste and the related impact on the environment.
- (8) Odd lot/batch overrun coatings will be reused as much as possible to reduce hazardous waste and the related impact on the environment.

Compliance Determination Requirements [326 IAC 2-1.1-11] [326 IAC 2-7-6(1)]

D.3.3 Testing Requirements [326 IAC 2-7-6(1)] [326 IAC 2-1.1-11]

The Permittee is not required to test these facilities by this permit. However, IDEM may require compliance testing when necessary to determine if these facilities are in compliance. If testing is required by IDEM, compliance with the VOC and VHAPs content limits specified in Condition D.3.2 shall be determined by a performance test conducted in accordance with Section C - Performance Testing.

D.3.4 Volatile Organic Compounds (VOC) and VHAPs

Compliance with the VOC content and usage limitations contained in Conditions D.3.1 and D.3.2 and VHAP content limitation contained in Condition D.3.2 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) using formulation data supplied by the coating manufacturer. IDEM, OAM, reserves the authority to determine compliance using Method 24 in conjunction with the analytical procedures specified in 326 IAC 8-1-4.

D.3.5 VOC Emissions

Compliance with Conditions D.3.1 and 3.2 shall be demonstrated within 30 days of the end of each month based on the total volatile organic compound usage for the most recent twelve (12) month period.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.3.6 Record Keeping Requirements

- (a) To document compliance with Conditions D.3.1 and D.3.2, the Permittee shall maintain records in accordance with (1) through (7) below. Records maintained for (1) through (7) shall be taken weekly and shall be complete and sufficient to establish compliance with the VOC emission limits established in Conditions D.3.1 and 3.2 as well as the VHAP content limit established in Condition D.3.2.

- (1) The amount and VOC content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
 - (2) A log of the dates of use;
 - (3) The volume weighted VOC content of the coatings used for each week;
 - (4) The cleanup solvent usage for each month;
 - (5) The total VOC usage for each week;
 - (6) The weight of VOCs emitted for each compliance period, and
 - (7) The maximum VHAP content in pounds of VHAP per pound solid, as applied, each day.
- (b) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.3.7 Reporting Requirements

A quarterly summary of the information to document compliance with Conditions D.3.1 and D.3.2 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported.

Indiana Department of Environmental Management Office of Air Management

Addendum to the Technical Support Document for a Significant Permit Modification to a Part 70 Operating Permit

Source Name:	Weiss Prestaining, Inc.
Source Location:	3522 South SR 104, LaPorte, Indiana 46350
County:	LaPorte
SIC Code:	2499
Operation Permit No.:	T 091-7626-00069
Significant Permit Modification No.:	091-11522-00069
Permit Reviewer:	Mark L. Kramer

On December 8, 1999, the Office of Air Management (OAM) had a notice published in the LaPorte Herald - Argus, LaPorte, Indiana, stating that Weiss Prestaining, Inc. had applied for a Significant Permit Modification to a Part 70 Permit to incorporate the equipment and conditions from the Construction Permit, CP 091-9572-00069, issued on December 1, 1998. The notice also stated that OAM proposed to issue a Significant Permit Modification and provided information on how the public could review the proposed Significant Permit Modification and other documentation. Finally, the notice informed interested parties that there was a period of thirty (30) days to provide comments on whether or not this Significant Permit Modification should be issued as proposed.

On January 6, 2000, Robert D. Waugaman of Bruce Carter Associates on behalf of Weiss Prestaining, Inc., submitted a comment on the proposed Significant Permit Modification. The comment is as follows:

Comment 1:

Condition D.3.3, Preventive Maintenance Plan, requires that a Preventive Maintenance Plan (PMP) be prepared in accordance with Section B of this permit for Machines 5 & 6. Weiss Prestaining, Inc., requests that this condition be removed as inappropriate and unnecessary for this facility. Section B.12, Preventive Maintenance Plan specifies in part that the following information shall be included in the Preventive Maintenance Plans "(1) identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices . . ." Since there are no control devices associated with Machines 5 & 6, it is not reasonable to expect a Preventive Maintenance Plan be developed in accordance with Section B, which as noted above references inspecting, maintaining and repairing emission control devices. If Indiana Department of Environmental Management (IDEM) is concerned about controlling emissions to stay below the emission limit referenced in Section D.3.1 (less than 250 tons per year), Condition D.3.7, Record Keeping Requirements, and Condition D.3, Reporting Requirements, adequately addresses record keeping and reporting to assure that these facilities stay within the limits of Section D.3.1.

Weiss Prestaining, Inc. respectively requests that Condition D.3.3 Preventive Maintenance Plan be removed in its entirety.

Response 1:

IDEM agrees that since there are no PMP actions that can be used for the flow coater operation and there are no control devices, Condition D.3.3 has been deleted as follows:

Weiss Prestaining, Inc.
LaPorte, Indiana
Permit Reviewer:MLK/MES

~~D.3.3 Preventive Maintenance Plan [326 IAC 2-7-5(13)]~~

~~A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for Machines 5 and 6.~~

Indiana Department of Environmental Management Office of Air Management

Technical Support Document (TSD) for a Significant Permit Modification to a Part 70 Operating Permit

Source Background and Description

Source Name:	Weiss Prestaining, Inc.
Source Location:	3522 South SR 104 LaPorte, Indiana 46350
County:	LaPorte
SIC Code:	2499
Operation Permit No.:	T 091-7626-00069
Operation Permit Issuance Date:	September 28, 1998
Permit Modification No.:	SPM 091-11522-00069
Permit Reviewer:	Mark L. Kramer

The Office of Air Management (OAM) has reviewed a request from Weiss Prestaining, Inc. to incorporate an issued Construction Permit into their issued Part 70 Operating Permit.

History

On November 3, 1999, OAM received an application from Weiss Prestaining, Inc. requesting that Construction Permit CP 091-9572-00069, issued December 1, 1998, be incorporated into their issued Part 70 Operating Permit. No new equipment is proposed. Weiss Prestaining, Inc. was issued a Part 70 Operating Permit, T 091-7626-00069, on September 28, 1998.

Note the one (1) natural gas-fired convection dryer chamber, known as H1, exhausted to general ventilation fans 1, 2, 3 and 4, rated at 4.32 million British thermal units per hour, is deemed an insignificant activity not specifically regulated and therefore does not appear in the equipment list in Section D.3 of the Significant Permit Modification.

Permit Modification

Pursuant to 326 IAC 2-7-12(d), this proposed significant permit modification to the Part 70 Operating Permit, T 091-7626-00069, issued on September 28, 1998, is required to incorporate a Construction Permit CP 091-9572-00069 issued on December 1, 1998 into the Part 70 Operating Permit.

Conclusion

The operation of this exterior wood siding painting and staining source shall be subject to the conditions of the attached proposed Significant Permit Modification SPM 091-11522-00069.
